

Daniel Dickson
1950 - 2005

While with us, Dan served as Special Projects Manager and more recently as Systems Manager. He brought to CRAB and gave to each of us the benefit of his enormous talent, his boundless energy, and an optimism that even in his absence will continue to inspire.

While it is difficult to contemplate the future without Dan, the memories he has given of his truest self will be with us always, and perhaps, in that way he will continue to both comfort us and remain a part of the best of all we do.

Daniel's obituary has been posted on the following website:
